I am a Javascript Frontend Web Developer with an eye for clean aesthetics and optimal User Experience via intuitive design. To grow my skills, I focus on building a full-stack application for a business called Talaria Order. Experienced in **MERN Stack, Web Development**

Front End: HTML5 / CSS3 / Sass / JavaScript / React / Redux

Back End: NodeJS / ExpressJS / Python / Django / Django REST Framework / Java / MongoDB / MySQL

UI / UX: Adobe XD / Photoshop / Transform PSD to HTML / Prototyping

Version Control: Git / Github

EDUCATION

California State University, Fullerton
- *Master of Science* in **Computer Science** [August 2019 - May 2021 (est)] **(GPA: 3.83)**
- *Bachelor of Arts* in **Marketing** [2015 - 2017]

PROJECTS

✦ **YELP CAMP |** *https://yelp-camp-react.herokuapp.com*

A MERN Stack Application that lets you post, like, and comment on popular camping sites
- Built **RESTful Web API** using expressJS for **CRUD Operations** to manage campgrounds, user registration and **authentication**, user comments and likes
- Used **mongoDB** for storage, better scalability and ease of management
- Developed front end with **React / Redux / Sass**
- **Automated Continuous Deployment** on Heroku with **Github Actions**

✦ **MOVIEDB |** *http://quiet-fortress-44277.herokuapp.com/*

A web application that lets you browse Movies and TV Shows
- Developed front end with **React / Redux / Sass / TMDB API**
- Queried data from **a public API**
- Implemented the **search functionality** with **Downshift**, improved performance with **lodash.debounce**
- Used **Heroku CLI** for deployment

✦ **TALARIA ORDER OFFICIAL WEBSITE |** *https://talariaorder.com/*

The official website for Talaria Order
- Built with **Gatsby.js**
- Integrated with **Facebook Messenger**
- Designed with **Figma**
- Used **Netlify CLI** for deployment, with **SSL Certificate**
